[Chemicals Box Opened in Google Earth for Adair Grain dba West Fertilizer.docx](#)

---

I'm not sure if you know about KML files. You can create them out of Tier2 Submit 2012 and/or CAMEO and then they automatically open up in Google Earth. You can choose to export the basic chemical information if you desire. I have attached an aerial photo for the West facility out of my old version of Google Earth. I have also attached what the chemical information looks like when you click on the blue mark point for the facility. The second document actually displays on the aerial photo. However, I cannot capture the screen shot to show you exactly what it looks like. Hope this is of use to you.

Thanks,

Congrats.... I agree on the largest amount, but they also listed it as the average amount over the year...

I agree. .... However, the Tier II amount is the largest amount present during the year. I figure during the spring they stock up, because everyone wants to fertilize at the same time. When you look at the aerial map for West – it is nothing but agriculture land and the houses/town that support those fields. ...

I have been reelected to represent EPA Region 6 on the NASTTPO Board. We are still planning to have the mid-year conference in conjunction with HotZone. Additionally, we are planning to have the annual conference spring of 2014 in New Orleans. Sure hope to see you at both events.

Thanks,

500,000,000 seems like an awful lot of ammonium nitrate...

My apologies for not getting this to you yesterday. Attached is the 2012 Tier II Chemical Report for Adair Grain Inc. d/b/a West Fertilizer Co. I believe the chemical quantities to be accurate. They have marked some chemicals as EHSs when they actually are not.

Please let me know if there is anything I can do to assist you.

Thanks much,

I am going to bet you have received a few requests for the latest Tier II forms from the facility....

Can I add my request to the list... I have already been asked several times from different elements within EPA...

If you have the 2012 as a .pdf, that would be perfect...
